DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 21, 28, 35, and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams et al (U.S. 5475735 A).**

As to **claim 21**, Williams discloses:

An apparatus (**RP 101, 104**) for providing mobile station registration (**column 5, lines 13-17; Figure 1**), wherein the apparatus comprises:

a base station (**RP 101, 104**) capable of receiving a registration message in a traffic channel from a mobile station (**portable 109, 110**), wherein the registration message is initiated from the mobile station before the mobile station registration is complete (**column 12, lines 61-67; column 13, lines 1-5**).

As to **claim 28**, Williams discloses:

A wireless communication system (**Figure 1**) comprising:

a mobile switching center (**RCPU**) capable of providing mobile station registration in a traffic channel (**column 8, lines 19-22; column 12, lines 64-66**); and

a mobile station (**portable 109, 110**) capable of sending in the traffic channel a registration message to the base station (**RP 101, 104**) before

the mobile station registration is complete (**column 12, lines 61-67;**
column 13, lines 1-5).

As to **claim 35**, Williams discloses:

For use in a wireless communication system, a method for registering a mobile station (**column 5, lines 13-17**), wherein the method comprises the steps of:

initiating and sending from the mobile station a registration message in a traffic channel to a base station (**column 12, lines 61-67; column 13, 1-4**); and

registering the mobile station in a mobile switching center (**column 13, lines 4-5**).

As to **claim 40**, Williams discloses everything as applied in claim 35 and Williams also discloses:

sending from the mobile station the registration message in a traffic channel to a traffic channel registration controller in the base station (**column 12, lines 61-67; column 13, lines 1-4**); and

registering the mobile station by the mobile switching center (**column 13, lines 4-5**).

Allowable Subject Matter

4. Claims 22-27, 29-34, 36-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
